Subject: Weiss Associates is seeking an environmental engineer, geologist or scientist with 3 to 10 years of experience

Dear Colleagues, Clients and Friends:

I am seeking to hire an environmental engineer, geologist or scientist. The individual I am looking for is intelligent, positive and technically competent and also seeks out challenges and is pretty good at solving those challenges. The person should be technically-oriented, of good humor, somewhat risk averse and enjoy working as part of a team. The right person can find a home at Weiss, as there is opportunity to grow into a leader at our firm.

The detailed position description is here: http://weiss.com/careers/EE_EM_201508.asp . The work will generally focus towards contaminant remediation, storm water management, and environmental compliance.

I very much encourage you to refer this email to any friends, relatives, coworkers or colleagues you have that might be interested in working in an established, fifty-person, San Francisco Bay Area environmental firm. We provide health care, sick leave, vacation and professional development benefits.

We also pay a referral bonus (\$2K to \$5K depending on staff level) if the referral leads to a hire.

Please don't hesitate to call me with any questions, or forward on my contact info to potential candidates.

Respectfully,

Scott Bourne, PE

Principal Engineer

Weiss Associates

Environmental Engineering, Science and Management

2200 Powell Street, Suite 925

Emeryville, California 94608
